

AUSTRALIAN OAK

ASH

Australia's most beautiful
floors start with Australia's
most beautiful hardwood.

World class, sustainable hardwood
flooring that sets a new standard for
looks and quality.

Australian Oak

What happens when you combine Australia's most beautiful native hardwood with leading floor construction methods? Australian Oak is the exciting new answer, now transforming our homes and our workspaces, and offering remarkable value for money, too.

Unmatched charm, local pedigree

We've combined beautiful, sustainably-managed Victorian Ash with a hard-wearing coating and a super stable substrate, manufactured to the quality you'd expect from Australia's leading hardwood manufacturer. The result is a floor of stunning architectural appearance that increases stability and speeds up installation, offering a financial saving in both time and materials. Australian Oak Flooring has an un-matched aesthetic feel that will add character and warmth with every board, and is made from a combination of re-growth and plantation hardwoods. You'll love the look, and the story.
